BE Information Technology

EXPERIENCE

- Developed and maintained responsive web applications, handling both front-end and back-end tasks to ensure a seamless user experience across various devices.
- Collaborated closely with the UX/UI team to enhance the website's interface, resulting in a 40% decrease in user drop-off rates during the onboarding process.

PROJECTS

Doctor Appointment booking system *- HTML ·CSS ·JavaScript · FastAPI · Django · PostgreSQL* Live ↗

- **Built a high-concurrency patient-doctor orchestration engine featuring a real-time availability calendar, automated appointment scheduling, and a secure HIPAA-compliant telehealth portal with end-to-end encrypted video consultations.**
- **Engineered a dynamic triage and notification layer utilizing Redis for sub-millisecond slot locking to prevent double-bookings, integrated Twilio for automated SMS/WhatsApp reminders, and deployed a scalable FastAPI microservice architecture on AWS ECS with automated CI/CD pipelines.**

MediSync

- React 18 · Node.js · FastAPI · PostgreSQL · Prisma ORM • i18next Live ↗

- **Built multilingual (EN/ES/JA/KO) full-stack health SaaS with 20+ REST endpoints — workout logging, AI macro calc, food-photo vision, Google OAuth, JWT auth, streak heatmaps, country-aware unit detection; live on Vercel + Render.**
- **Designed normalized PostgreSQL schema (Prisma ORM) covering Users, Workouts, Nutrition, Progress, AI Conversations; implemented 100+ exercise library and badge/achievement system across 4 languages.**
